

EVOLUTION OF TECHNOLOGY

ZETA is a globally active solutions provider that supports pharmaceutical and biotech companies in bringing vital medicines – such as insulin, infusions, and cancer treatments – to market faster and more efficiently. As an innovation leader, we combine technical expertise with digital excellence, covering everything from planning and construction to automation and qualification of customized process systems. In addition, we take on full responsibility for complex projects as an EPCMV partner, drive digital transformation, and develop sustainable strategies for decarbonization.

Senior Process Facility Engineer

Location: **Gdansk**

Employment: **Full-time employee**

Entry date: **As of now**

Your tasks

- Performing calculations related to technological process (e.g. batch optimization) and logistic (e.g. warehouse storage capacity)
- Carrying out technological process analysis, selecting process equipment and technological lines
- Development of block flow diagrams and mass balance
- Development of process equipment list including demand for utilities and power consumption
- Determining exposure level and the methods of containment
- Determining the technological process waste management
- Development of process rooms layouts, including arrangement of equipment
- Development of GMP-compliant layouts: clean zones, personnel, materials and waste flow, pressure cascades
- Defining project assumptions for other disciplines (e.g. utilities connections)
- Defining requirements for technological process automation
- Defining functional requirements for IMS systems supporting technological process
- Development of technological descriptions of designed plants
- Development of User Requirements Specifications for process equipment
- Development of functional specifications and P&IDs for technological systems
- Preparation and issue of project documentation

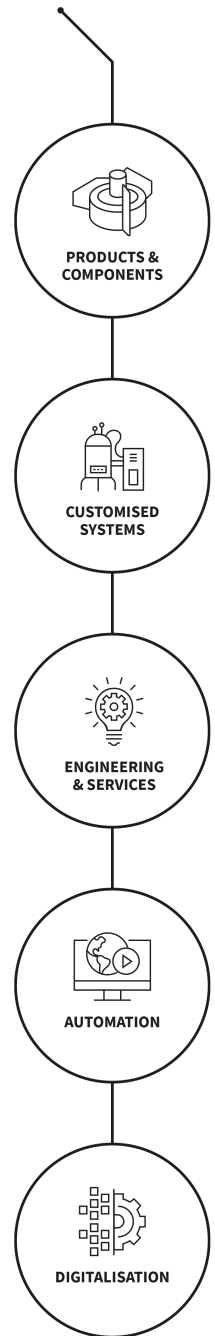

Your profile

- M.Sc. Degree in field of Life Sciences (Chemical and Process Engineering, Biotechnology, Industrial Pharmacy etc.)
- At least 5 years of experience in working in a similar position (engineering and / or production company)
- Knowledge of MsOffice and Revit / AutoCAD
- Readiness for domestic and foreign business trips
- Readiness to work on construction sites (installation, commissioning and qualification of technological devices)
- Good knowledge of spoken and written English (at least B2 level)
- Teamwork personality with good communication skills and ability to work independently
- Focused and details oriented
- Ability to develop and execute competitive solutions

Under the motto "Let's Engineer Your Career Together" we are looking forward to receiving your application!
